South32
Patagonia Street Improvements

Town of Patagonia, Arizona

August 12, 2020 (Revised to clarify phase 1 & phase 2 November, 2020)

South32 is committed to working collaboratively with the communities where we operate.

South32 and the Town of Patagonia identified a need to improve the integrity of a few roads in town, improve pedestrian safety along the designated truck route, and improve the helicopter landing area.

South32 presented the initial plans to the Patagonia Town Council for approval in June 2020 and received a notice to proceed in August 2020.

The project was then divided into two phases. Phase 1 is roadwork on Harshaw Road and Taylor Avenue, which began on November 16 and will conclude in December, 2020. Phase 2 will commence May 2021 and should conclude before the Fourth of July holiday in order to minimize disruption to local businesses.
