SOUTH32 PROVIDES DONATION FOR MOZAMBIQUE FLOOD RECOVERY EFFORTS

South32 has donated US\$700,000 to support the flood response and recovery efforts in southern Mozambique.

The donation has been provided to international aid organisation Caritas, which is working to provide disaster relief in Mozambique following widespread flooding from intense rainfall associated with Tropical Cyclone Freddy.

The impact to people living in communities near our Mozal Aluminium smelter has been severe, with approximately 6,000 hectares of agricultural land and more than 7,000 homes flooded. Many of those impacted by the floods make their livelihoods from farming and agricultural activities.

South32's donation to Caritas will provide about 3,900 agricultural kits, including farming tools and implements, and 12,600 seed kits to help restore the livelihoods of those living in the Boane, Namaacha and Moamba districts of southern Mozambique. The donation will also provide food for 1,000 vulnerable local families.

South32 Chief Operating Officer Noel Pillay said "Our thoughts continue to be with those across Mozambique and Madagascar who have been impacted by Tropical Cyclone Freddy.

"We're thankful for the agencies and non-government organisations providing disaster relief and supporting recovery efforts. Our donation will provide food for 1,000 vulnerable families as well as supporting the longer-term recovery from the flooding by helping to restore farming and agricultural livelihoods."

About us

South32 is a globally diversified mining and metals company. Our purpose is to make a difference by developing natural resources, improving people's lives now and for generations to come. We are trusted by our owners and partners to realise the potential of their resources. We produce commodities including bauxite, alumina, aluminium, copper, silver, lead, zinc, nickel, metallurgical coal and manganese from our operations in Australia, Southern Africa and South America. With a focus on growing our base metals exposure, we also have two development options in North America and several partnerships with junior explorers around the world.
