7	<p>ENVIRONMENT UPDATE</p>
	<p>Water storage in area 3B has remained high, has come down since last meeting</p> <p>Noise exceedance at Kemira Valley influenced by weather conditions.</p> <p>Flow meter at LDP 5 has been installed. Kemira Valley flow meter partially installed.</p> <p>Air quality and greenhouse gas management plan and water management plan have been reviewed and submitted for approval.</p> <p>Rehabilitation Management Plan</p> <p>Feedback received from resources regulator on rehabilitation objectives and final land use rehabilitation plans.</p> <p>Rehabilitation Objectives:</p> <ul style="list-style-type: none"> • Request to resubmit to change formatting, spatial references, allocation of objectives to spatial references and change in final land uses and wording of objectives. • Plant Community Types (PCTs) for each area to be rehabilitated to native ecosystem are to be identified. <p>Final Land Use:</p> <ul style="list-style-type: none"> • Consistency between spatial references and update to reflect changes in objectives. • RMP is being reviewed to address this feedback. • RMP and revised rehabilitation objectives are planned to be submitted to the Resources Regulator by the end of June and will be updated on the IMC website. <p>PG – The final ownership of the land, what happens with that?</p> <p>GB – IMC owned land will be donated or sold. Land owned by the State will revert to the landowner. A number of options are available depending on which parcels.</p> <p>PD – who owns the land next to the motorcycle tracks?</p> <p>PG - there is some confusion about who owns the land as some records were lost or destroyed.</p> <p>GB – need to clarify the parcel of land.</p> <p>ACTION: PD to provide a mud map and send through to GB and RM.</p> <p>ACTION: GB to provide a map of South32 owned land.</p>

	<p>Dendrobium Area 3A/3B Impacts</p> <p>Discussion on the total impacts that have been identified as well as swamp, soil moisture, and ground water monitoring.</p> <p>PC – if no surface water being retained, how does it affect fire risk assessment or protection, in response to any upcoming weather cycles?</p> <p>GB - the fire risk for a specific feature would be greater if that area was dry compared to being wet. The bushfire risk is one of the impacts that has been assessed as part of the mining approvals process. The most recent major approvals/assessment was in 2008. IMC is unaware of any evidence that mining impacts bushfire risk at the landscape level.</p> <p>Catchment tour</p> <p>Tour held on 4 May and attended by PD</p> <p>Sites visited included:</p> <ul style="list-style-type: none"> • Swamp 1b and tributary DC13 • Watercourse WC21 – trial rehabilitation site • Swamp 14 and WC15 pool 34 • Swamp 35b and tributary <p>PD - expressed concerns about the aquatic health and water levels of the sites visited, and cumulative effects of mining in the catchment area.</p> <p>GB - the streams that are directly mined beneath are dry unless there has been rain. The rehabilitation trial (two pools) is still progressing and is currently in the monitoring phase. A report will be submitted to government at the end of the trial.</p> <p>PD – the ground over Maldon Dombarton rail corridor appeared to rise and fall about 2m over a 300m interval.</p> <p>GB – the maximum subsidence is about 2m reducing to 0.5m over the pillars. The Maldon Dombarton rail corridor follows the ridge line and if it is used in the future, then those impacts would be mitigated.</p> <p>PD – is there grouting of Swamp 14, or is it more on WC21?</p> <p>GB – There is no grouting on Swamp 14 or WC15 – two pools were trialled in WC21.</p> <p>PD – would like to view that area when it’s available.</p>
8	COMPLAINTS
	<p>April: no complaints</p> <p>May: one noise complaint regarding rail operations.</p> <p>PD – was there resurfacing of the rail tracks? There have been some high-pitched screeching sounds.</p> <p>ACTION: ST will enquire with maintenance contractor.</p>
