

SOUTH32 WORSLEY ALUMINA COMMUNITY UPDATE

September 2025

KEEPING YOU IN THE LOOP!

It's been a bustling few months across our operations and community engagement efforts in the Boddington region. From meaningful conversations with local groups to steady progress on key projects at the mine, we've been actively working to strengthen our connections and deliver on our commitments.

>>> UNTIL NEXT MONTH

Trever Stockil, General Manager Mine and Materials.

WE'RE PART OF THE COMMUNITY

South32 was proud to sponsor the Boddington Golf Club's Ladies and Men's Open Days in July and August — fantastic events that brought together golfers of all ages in the spirit of fun and community.

We contributed \$1,000 to each event, along with \$3,000 to help the club purchase a portable toilet, improving access to facilities on the course.

Congratulations to all who took part — it's events like these that bring people together and celebrate the active Boddington community.

On 4 August, South32 Worsley Alumina proudly volunteered alongside the Rotary Club of Harvey to help Year 12 students at Harvey Agricultural College with their annual mock interviews. We were truly impressed by the confidence and professionalism shown by the students.

This partnership builds on our ongoing relationship with Rotary, including our three-year Social Investment Agreement to sponsor the Harvey Recycling Regatta — supporting youth and community initiatives every step of the way.

CELEBRATING LOCAL

Did you know for over 40 years South32 Worsley Alumina has been one of the largest employers in the Peel and South West regions?

In FY2025 we provided

2,500

local jobs through direct employment or contractors.

**BRIGHTER
FUTURES,
TOGETHER**

If you have any concerns or want to speak to South32 you can contact us at worsleycommunity@south32.net or contact South32 Boddington Bauxite Mine by phone on 1800 555 958.

CLEAR SKIES OR FOGGY DAYS – THERE'S ALWAYS SOMETHING TO **LEARN** AT BODDINGTON

Whether the sun is shining or the mist rolls in, there's always something to see and learn across our rehabilitated areas — some dating back over 40 years.

Join our field experts for an immersive journey through the Boddington Bauxite Mine, where you'll explore a variety of rehabilitation zones and see animal habitats. Along the way, you'll gain insight into how we manage our environmental footprint and work to rehabilitate the land with care and intention.

Come and see how past, present, and future come together in our commitment to responsible mining during our next monthly Rehab tour on 25 September.

Daniel and Sophie Harris enjoy their first mine rehabilitation tour.

The Harris family visiting from Katanning with tour led by South32 Geologist, Lachlan Coops (green helmet).

Boddington locals Gwen and Laurie Tonkin with South32 rehab tour team members.

9:30am-11am

NAIDOC AND INDIGENOUS ARTWORK CELEBRATION

At the start of July we held a NAIDOC celebration and Indigenous Artwork unveiling ceremony at the Bunbury Port, which included a Welcome to Country from Les Wallam and a smoking ceremony led by GKB General Manager, Karim Khan. We are also pleased to announce that Bianca Willder and Donald Turvey have been selected to have their artwork showcased at Bunbury Port, Boddington Bauxite Mine, and Collie Refinery. It was a special and meaningful event, marking the importance of cultural recognition and shared respect.

HANDS ON LEARNING

In July, we were pleased to welcome 20 UWA Chemical Engineering students on a three-day tour of key resource and industrial sites across the South West, including Laminex, Albemarle, SIMCOA, and South32. The South West Trip offers students valuable, hands-on experience by connecting their classroom learning with real-world engineering and mining operations. We hope to see some of these future engineers again — perhaps even as part of our team one day. After all, more than 70% of our workforce lives locally in Boddington, Collie, or Greater Bunbury.

TREE PLANTING IN COLLIE

In June, our volunteers teamed up with the Leschenault Catchment Council to plant native seedlings along the Collie River foreshore at Soldier's Park — helping restore local biodiversity.

12,500 SEEDLINGS PLANTED

In July, the South32 Environmental team continued its important revegetation efforts with the support of the Danju Ranger Team planting an impressive 12,500 native seedlings along a local creek line in the Leschenault Catchment Council.

This marks the second consecutive year of planting in the area. Last year's seedlings are now thriving in the rich clay soils, showing strong establishment and growth - a promising sign for the long-term health of the creek and surrounding ecosystem.

PAVING THE WAY

South32 Worsley Alumina was proud to sponsor the Chamber of Minerals and Energy of Western Australia Inspiring Girls Forum on 31 July 2025 — a key event that empowers young women to explore careers in the mining and resources sector.

We were especially proud of Dusti Rowden, Technician Maintenance Fitter at our Collie Refinery, who delivered a powerful keynote address:

"To every young girl who's ever been told something's not for her — I'm telling you: this is."

Dusti shared her career journey, the opportunities she's embraced at Worsley, and the many rewarding paths available to those willing to step forward.

LOWER HOTHAM ROAD CLOSURE

South32 wishes to advise our neighbours of intermittent road closure at the intersection of Lower Hotham Road and the Overland Bauxite Conveyor (OBC) from 0600 – 1800 on 2 & 3 September 2025.

South32 will be executing the cutover from overhead lines to underground power.

Road closure will be intermittent up to 30minutes each (occurring no more than four times over the two days). Traffic control will be in place for this period.

If you have any concerns or want to speak to South32 you can contact us at worsleycommunity@south32.net or contact South32 Boddington Bauxite Mine by phone on 1800 555 958.

LOCALLY AND GLOBALLY RESOURCEFUL

We're more than a local employer. While creating jobs regionally, we're producing alumina which is a key material in the production of aluminium, a commodity critical to a low-carbon future.

Aluminium is lightweight, durable, recyclable and can conduct electricity, meaning it has a wide range of applications, including in construction, transportation, electrical wiring packaging and consumer goods. We're proud to contribute to the supply of this critical material to help create a brighter future.

CLONTARF EMPLOYMENT FORUM

The Employment Forum is an important development event for Senior Clontarf Foundation students (Year 11 and 12) to engage with partners from industry to further understand what career prospects may be suited towards their own life's story. The format of the event is designed to allow students to gain exposure into various industries, interview practices and additional work ready tips and tricks to long and sustained career pathways.

South32 will soon enter into a new 2-year Social Investment agreement with the Clontarf Foundation, supporting boys at the Newton Moore, Collicie and Narrogin Academies.
